Become a franchisee for less than £12k

Work for yourself, not by yourself, with a Snap-on franchise

Snap-on is the world's number one tool brand and it's also a great business opportunity! Usual start-up costs are £24,143 but now, with our exclusive Jump Start package, you only need initial funds of £11,755. We'll then fund the remaining investment on a ten-year interest-bearing loan through our in-house bank, Snap-on Finance*. As a franchisee, you will own and run your iconic showroom on wheels. We have over 400 franchisees who come from all walks of life - many are former technicians or mechanics.

- ▶ Full training and a lifetime of support
- ▶ Keep 100% of your profits
- ▶ Join a network of likeminded people
- ▶ Enjoy more freedom and flexibility

*subject to personal status

"I'd been a Snap-on customer for years and had always been interested in the franchise opportunity, but it was the promotional price that encouraged me to finally decide to just go for it."

Alex McNellan, franchisee

This is your opportunity to build a profitable business, doing what you love.
There's only one question really... What are you waiting for?

£12k offer available nationwide

For a limited time only - don't miss out!

- Solid 8" polyurethane wheels are puncture proof and provide a smooth ride on any surface

GREAT FOR SERVICE TRUCKS,
AGRICULTURAL MACHINERY REPAIR,
HEAVY-DUTY WRECKERS OR
CONSTRUCTION EQUIPMENT REPAIR!

DIAGNOSTIC ACCESSORIES!

Gas analysis should be the first and final tests on vehicles with suspected combustion or emissions issues...

The Snap-on 5 gas analyser lets you do these tests, measuring vehicle exhaust emissions for:

1. **Carbon Monoxide (CO)** - indicates partially burnt fuel - inefficient combustion
2. **Carbon Dioxide (CO₂)** - indicates totally burnt fuel - efficient combustion
3. **Hydrocarbons (HC)** - indicates unburnt fuel (petrol) not used for combustion - misfires
4. **Oxygen (O₂)** - indicates 'rich' or 'weak' mixture in combustion or misfires
5. **Oxides of Nitrogen (NOx)** at weak mixtures under load (high combustion temperatures), Nitrogen combines with Oxygen to form NOx - a very poisonous gas that is now a main part of the Euro 6 (2014) emission standards - ideal for diesels

5 GAS ANALYSER CAN ALSO MEASURE LAMBDA/AIR-FUEL RATIO AND CORRECTED O!

5 GAS ANALYSERS!

PART NO.	PRODUCT	KIT CONTENTS
HHGA5CP	5 Gas Analyser with Infra-red Printer	5 Gas analyser, exhaust probe, AC & DC chargers, USB memory stick, hard case and infra-red printer
HHGA5C	5 Gas Analyser	5 Gas analyser, exhaust probe, AC & DC chargers, USB memory stick and soft pouch

		GOOD	BAD
Carbon Monoxide	CO	Approx 0.5% or less	More = Too much fuel/rich mixture
Hydrocarbons	HC	Approx. 100ppm or less	More = Misfire
Carbon Dioxide	CO ₂	Approx. 14-15%	Less = Reduction in engine efficiency
Oxygen	O ₂	Approx. 0.1 - 1%	More = Too much air/lean mixture
Oxides of Nitrogen	NOx	Approx. 100-200ppm	More = Engine too hot/lean
Air Fuel Ratio/ Lambda	AFR/ λ	AFR=14.7:1 λ = 1	High = Too much air (lean) Low = Too much fuel (rich)

BLUETOOTH FUNCTIONALITY LINKS WITH SELECTED DIAGNOSTIC PLATFORMS TO COMBINE GAS ANALYSIS WITH OTHER VEHICLE DATA!*

PLUS, ADD THE MOTORCYCLE PROBE IF YOU DO BIKE WORK!

KANEPAUTO8

*Bluetooth functionality with selected diagnostic platforms only, speak to your franchisee for more details.

WE CAN GO ALL DAY LONG!

FREE STARTER PACK WHEN YOU BUY ANY FEATURED BELT DRIVE AIR COMPRESSOR!*

WHY CHOOSE AIR OVER BATTERY?

A compressor is a continuous source of power. In a busy working environment it may not be as efficient to use the limited power source of a battery where you rely on having to remember to charge spare batteries.

Useful applications of air tools/compressors include:

- Paint spraying, tyre removing, cleaning with blow guns
- Sanding and grinding are key uses of a pneumatic tool due to the continuous use of power required for the job
- Battery impact wrenches are limited in torque and anvil size - this means they can't be used in every instance of removing a wheel
