#### The Snap-on Tools Limited Pension and Benefits Plan (the `Plan') Annual Chair's Statement

#### Plan year-ended 30 April 2020

Regulations effective from 6<sup>th</sup> April 2015 require the Trustees to prepare a statement showing how they have met certain minimum governance standards in relation to the Plan's defined contribution benefits. These standards cover four principal areas namely:

- The default investment arrangement;
- Core financial transactions;
- Value from member borne deductions and
- The Trustees' knowledge and understanding.

As Chair of Trustees, it is my pleasure to report to you on how the Trustees have embedded these minimum standards over the period 1 May 2019 to 30 April 2020.

#### The investment arrangements

The Trustees are responsible for setting the Plan's investment strategy and for appointing investment managers to carry out that strategy. They must also establish a default investment arrangement for members who do not select their own investment options from the fund range that is available.

The Plan's investment platform is held through Legal and General (L&G). The current default fund for all DC members of the Plan is the L&G Multi-Asset fund. The L&G Multi-Asset fund adopts a lifestyle approach to manage risk throughout a member's lifetime in the Plan until three years prior to the member's selected retirement date, at which point a member's pension pot will gradually be moved into the L&G Cash fund so that at a members' selected retirement age 100% of a member's assets will be invested in the L&G Cash fund.

At Retirement Phase

The structure of the default in shown in more detail below:

LGIM Multi Asset Fund 3 LGIM Cash Fund 3

The Trustees undertake a holistic and strategic review of the Plan's investment arrangements periodically. Ad hoc reviews of strategy and/or investment policy are also undertaken in the event of significant legislative, market or member demographic changes.

The last strategic review of the default investment strategy was undertaken and completed in March 2020 to ensure the Trustees offer members access to a default option, appropriate investment strategies, funds and options to consolidate assets in an appropriate range of funds, taking account of the type of membership.

The investment review that was undertaken included a review of the default strategy and performance of the default arrangement. It covered the following:

- Analysis of the membership
- Consideration of market trends
- Review of the objective for the default, including the growth phase and at retirement portfolios
- Review of the switching period.

Given the membership of the Plan will retire with Defined Benefit ("DB") retirement benefits as the bulk of their retirement pot, it is likely that most members will use their savings from this Plan as a means of drawing tax free cash to supplement any retirement income from the DB section. The DC section of the Plan is not used for automatic enrolment purposes but there is active membership. The outcome of the review confirmed this position and the Trustees agreed to maintain the current default investment strategy as it still aligns with the current membership profile and performance remains consistent with the aims and objectives of the Statement of Investment Principles.

The Plan also holds Additional Voluntary Contribution (AVC) assets with Prudential via a With-Profits fund, which is closed to future contributions. The Plan previously held assets with Equitable Life. As at 1 January 2020, Equitable Life transferred all its business to Utmost Life and Pensions Limited. All assets in the Equitable Life With Profits Fund were disinvested and re-invested in the Utmost Secure Cash Fund. The last members who had assets invested in these funds retired during this period and the member's assets have been disinvested.

The Trustees' Statement of Investment Principles (SIP) dated August 2020, which includes the principles in relation to the Plan's default investment arrangement, is attached to this statement. This covers our aims and objectives in relation to the default investment arrangement as well as our policies in relation to matters such as risk and diversification. It also states why we believe that the default investment arrangement is designed in members' best interests. Following the review referred to above, and the ongoing review of the performance of the Plan's default investment strategy, we believe the performance is consistent with the aims and objectives outlined in the SIP.

#### **Requirements for processing financial transactions**

As required by the Administration Regulations, the Trustee must ensure that "core financial transactions" are processed promptly and accurately. Core financial transactions are (broadly):

- Investment of contributions made to the Plan by members and their employer;
- Transfer of members' assets into and out of the Plan;
- Switches of members' investments between different funds within the Plan; and
- Payments from the Plan to, or in respect of, members (e.g. payment of death benefits).

The Trustees monitor the extent to which the Plan's core financial transactions are processed promptly and accurately through the receipt of reports from L&G.

The Trustees recognise the importance of processing financial transactions promptly and accurately as failure to do so may have an adverse effect on member outcomes and may result in members disengaging with the Plan.

The Plan's administration is outsourced to L&G. Service levels and timescales have been agreed for the processing of all member-related services, including core financial functions such as investment switches and benefit payments. The Trustees have a service level agreement ("SLA") in place with the administrator, which covers the accuracy and timeliness of all core transactions. A report is received at least annually from L&G that references the SLA in place and the performance of core financial transactions against SLA.

L&G operate a workflow system, which enables L&G to log work requests with SLAs to allow improved flexibility for creating reports and also being able to drill down to specific work requests, teams and individuals, to measure and monitor their performance. This workflow system enables L&G to produce regular dashboards, which, using RAG (Red, Amber, Green) status reporting, provide this information at individual task level. L&G's quality assurance team uses the workflow system to ensure that quality standards are met and maintained.

The L&G report for the year ending 30 April 2020 shows service in a number of areas related to core financial transactions. 91% of cases related to core financial transactions were achieved within SLA, which the Trustees have deemed to be satisfactory in so much as core financial transactions have been processed promptly and accurately. Of the three cases that missed SLA; these were all retirement payments and were delayed as a result of the information being supplied to the incorrect team at L&G. Correct contact details have been supplied to ensure repetition does not occur. L&G performed calculations to ensure members were not financially disadvantaged by any delays.

Prudential perform administration services in relation to the Prudential With-Profits fund. The Trustees monitor SLA performance via reporting from Prudential. The Trustees are awaiting this reporting from Prudential and will follow-up accordingly.

The Trustees will continue to monitor administration service and are aware of the escalation points if service falls below expectations.

#### Value from member borne deductions

The Trustees are required to report on the charges and transaction costs for the investments used in the default arrangement as well as the wider fund choice available, and assess the extent to which the charges and costs represent good value for members. When preparing this statement, the Trustees have taken account of statutory guidance when producing this section.

The total charges payable will vary depending on the stage that each member has reached in the default arrangement's growth and de-risking phase. The Annual Management Charges ("AMCs") and Total Expense Ratios ("TERs") applicable to each of the Plan's funds that are available to members are detailed below:

#### Default arrangement

Manager	Fund	AMC (% p.a.)	TER (% p.a.)
Legal & General	Cash Fund	0.44	0.44
(L&G)	Multi-Asset Fund	0.48	0.48

These funds are also available to self-select

#### Self-select funds

Prudential	With-Profits Fund	No explicit	No explicit
		charges	charges

#### Source: L&G, Prudential

The charges provided in the tables above have been provided by L&G as at 31 March 2020. The trustees are in communication with L&G to obtain fund charges at the Plan year end of 30 April 2020. The charges quoted are paid by members whilst invested in those funds.

#### **Transaction costs**

The charges referred to above do not include transaction costs. These are costs incurred by fund managers as a result of buying, selling, lending or borrowing investments. These costs are taken into account by the fund managers when calculating the unit price for each of the funds. The transaction costs shown are calculated on a methodology known as 'slippage cost'. This compares the price of the stocks being traded when a transaction was executed with the price at which the transaction was requested. Market movements during any delay in transacting may be positive or negative and may also outweigh other explicit transaction costs. For this reason, overall transaction costs calculated on the slippage method can be negative as well as positive.

When buying and selling investments, transaction charges are often applied to the funds being bought or sold. In the below table, we set out the transaction charges applied in the Plan's default fund.

Manager	Fund	Transaction Cost (%
Legal & General	Cash Fund	-0.05
(L&G)	Multi-Asset Fund	0.04
	UK Equity Fund	-0.02
	Retirement Income Multi Asset Fund	0.04
	All Stocks Index Linked Gilts Index Fund	0.11
	All Stocks Gilts Index Fund	0.03
	Global Equity Market Weights (30:70) Index Fund 75% GBP Currency Hedged Fund	0.04
Prudential	With-Profits Fund	Data not available

#### Source: L&G

Transaction costs quoted in this statement were applicable as at 31 March 2020. The trustees are in communication with L&G to obtain fund charges at the Plan year end of 30 April 2020. Data from Prudential was requested but not available at the time of reporting. The Trustees have followed up with Prudential. Transaction costs are paid by members.

Using the charges and transaction cost data provided by L&G, the Trustees have prepared an illustration detailing the impact of the costs and charges typically paid by a member of the Plan on their retirement savings pot. The statutory guidance provided has been considered when providing these examples.

The below illustration has taken into account the following elements:

- Savings pot size;
- Contributions;
- Real terms investment return gross of costs and charges;
- Adjustment for the effect of costs and charges; and
- Time.

#### Deferred member illustration (youngest member):

#### Notes:

- 1. Projected pension pot values are shown in today's terms and do not need to be reduced further for the effect of future inflation.
- 2. Inflation is assumed to be 2.5% each year.
- 3. For active members, the starting pot size is assumed to be  $\pounds$ 1,500 for the youngest member and  $\pounds$ 17,000 for the typical member; this is representative of the average for the Plan.
- 4. For deferred members, the starting pot size is assumed to be £4,000 for the youngest member and £7,000 for the typical member; this is representative of the average for the Plan.
- 5. For active members, salary is assumed to be  $\pm 30,000$  p.a. for the youngest member and  $\pm 30,000$  p.a. for the typical member. Future salary increases are assumed to be zero in real (inflation-adjusted) terms.
- 6. For active members, total contributions are assumed at 3% of salary each year. No contributions are assumed for deferred members.
- 7. Values shown are estimates using long-term expected rates of return, and understate the level of market volatility experienced. These outcomes are not guaranteed.
- 8. For the default arrangement, which is a lifestyle strategy, the projections take into account the changing proportion invested in the different underlying funds over time and the growth rates may be a blend of those shown below where there is a blend of different asset classes.

- 9. The projected growth rates (including inflation) for each fund are as follows and use the same underlying assumptions as the Statutory Money Purchase Illustration assumptions plus any transaction costs:
  - LGIM UK Equity Index: 4.1%
  - LGIM Global Equity Market Weights 30:70 Index: 4.5%
  - LGIM Multi Asset: 3.5%
  - LGIM All Stocks Index Linked Gilt Index: 0.7%
  - LGIM All Stocks Gilts Index: 0.7%
  - LGIM Cash: 0.7%
  - LGIM Retirement Income Multi Asset: 3.1%

10. Fund charges consist of Total Expense Ratios and Transaction Charges.

The Trustee Directors acknowledge the requirement to publish these illustrations on a website and this Chair's Statement with the charge illustrations above will be available on a website. The 2020 benefit statements will include the web address.

#### Value for Money

The Trustees are required to undertake a review of the charges and transaction costs incurred by members in order to ascertain whether or not they represent good value for members, relative to peers and alternative arrangements that are available.

The Trustees with support from their advisors, Mercer Ltd, has undertaken a value for members' assessment for the year ending 31 March 2020. This was undertaken at this date rather than the Plan year end of 30 April 2020, due to the availability of fund performance data. The assessment covered the following aspects:

- Investment charges for the default and self-select funds, when benchmarked against comparable funds;
- Net of fees investment performance; and
- Investment fund range and ratings.

The Trustees concluded that the Plan's overall benefits and options represent value for money in comparison to the costs payable by members. The reasons underpinning this conclusion include:

- Charges on funds have been assessed by our advisors as comparing favourably with those of peer funds.
- The funds used by the Plan are highly rated by Mercer Ltd as having good prospects of achieving their risk and return objectives.
- The performance of the Plan's funds over the 3 years to 31 March 2020 compare favourably relative to their benchmark or objective, noting that the impact on investment markets in Q1 2020 will have had a detrimental impact on members' savings over the year being covered
- The transaction costs provided appear to be reflective of costs expected of the various asset classes and markets that the Plan invests in, noting that there are limitations on how these can be benchmarked at the current time.

The Plan's assets also include with-profits policies with Prudential. By their nature, the charging structure of with-profits policies is not transparent. The Trustees remain of the view that there is limited value in undertaking a market review of price and performance.

#### Trustee Knowledge and Understanding

The Trustees are required to maintain an appropriate level of knowledge and understanding which, together with the professional advice that is available to them, enables them to properly exercise their functions and duties in relation to the Plan. In addition, the Trustees receive advice and recommendations on investment and other issues from Mercer Limited, as well as on new issues that require Trustee decisions.

There have been a number of changes to the group of Trustees, including the appointment of a new Chair of Trustees, within the Plan year. The induction process for new Trustees is set out below:

- Newly appointed individuals to complete the Pensions Regulator's Trustee Toolkit within six months of initial appointment; and
- Training as a Board on topical issues.

The Chair and the new members have been directed to The Pension Regulator's Toolkit in order to acquire the necessary knowledge to support them in fulfilling their duties. All Trustees, except one, have completed the Toolkit. The remaining Trustee has committed to completing the Toolkit by January 2021.

Training on relevant topics is undertaken when the Trustees are required to make decisions. An example of the training received over the year is relating to a review of the default investment strategy, where the Trustees worked with their advisers to understand the membership demographic, consideration of market trends and a review of the objective and switching period of the default investment strategy.

During the course of the Plan year, the Trustees have also received training related to the following topics:

- Environmental, Social and Governance Policy Education 29 May 2019
- Statement of Investments Principles and Environmental, Social and Governance factors 10 September 2019
- Competitions and Market Authority (CMA) review 10 September 2019
- Chair's Statement and Value for Members Assessment 10 September 2019
- DC Code 10 September 2019
- Trustee roles & responsibilities 21 January 2020
- Trust Deed & Rules 21 January 2020
- The Pensions Regulator expectations and guidance 21 January 2020
- COVID-19 impact on UK pension schemes 3 April 2020

The Trustees have a working knowledge of the Plan's Trust Deed & Rules and Plan documents. The Trustees have sufficient knowledge and understanding of the law relating to pensions and trusts and of the relevant principles relating to the fund and investment of occupational pension schemes. The Trustees are conversant with Plan policies and other important documentation, such as investment and administration reports to assess whether the Plan is working effectively. The Trustees have a working knowledge of the SIP and the principles within the SIP have been accounted for when considering the investment arrangements, including the default investment strategy review that took place in the Plan year. The SIP has been further updated in August 2020.

The advisers provide the Trustees with updates and current topics in relation to DC schemes and the Trustees have taken action where needed. An example of this relates to the new requirements on the disclosure of costs and charges

The Trustees have undertaken training related to the DC Code of Practice during the Plan year to developing their understanding further.

During the next Plan year, it is proposed that the Trustees undertake a knowledge gap analysis to determine further training requirements. This will include a plan to implement training to rectify any knowledge gaps.

Taking into account the actions taken individually and as a group, the knowledge and experience of the Trustees, and the professional advice available to it, the Trustees consider they are able to exercise their responsibilities but are seeking continued development over the coming year, given the changes to the composition of the Trustee board.

I confirm that the above Statement has been produced by the Trustees to the best of their knowledge.

Snap-On SIP August 2020 (clean). Statement of Investment Principles.

# Snap-on Tools Limited Pension & Benefit Plan

#### **Statement of Investment Principles**

#### 1. Introduction

The Trustees of the Snap-on Tools Limited Pension & Benefit Plan ("the Plan") have drawn up this Statement of Investment Principles ("the Statement") to comply with the requirements of the Pensions Act 1995 ("the Act") and subsequent legislation. The Statement is intended to affirm the investment principles that govern decisions about the Plan's investments. The Plan's investment arrangements, based on the principles set out in this Statement, are outlined in the Investment Implementation Policy Document ("IIPD"), which is available to Plan members on request.

The Trustees have obtained and considered written professional advice from Mercer Limited (the "Investment Consultant") in preparing this Statement. The Trustees believe that this meets the requirement of the Act and subsequent legislation. In matters where the investment policy may affect the Plan's funding policy, input has also been obtained from the Plan Actuary. The Trustees will obtain similar advice whenever it reviews this Statement.

The Trustees seek to maintain a good working relationship with the Principal Employer and will discuss any proposed changes to the Statement with the Principal Employer. However, the Trustees' fiduciary obligations to the Plan's members will take precedence over the Principal Employer's wishes, should these ever conflict.

The Trustees will review this Statement in response to any significant changes to any aspect of the Plan, its liabilities, finances and the attitude to risk of the Trustees and the Principal Employer that it judges to have a bearing on the Statement. This review will occur no less frequently than triennially.

#### 2. Structure of the Plan

The Plan has both Defined Benefit ("DB") and Defined Contribution ("DC") Sections. This Statement covers both the DB and DC Sections.

#### 3. Asset Management

#### 3.1 Process for Choosing Investments

The stewardship of the Plan's investment arrangements falls into the following three main areas of responsibility:

- i. The *strategic management* of the assets, which is fundamentally the responsibility of the Trustees, acting on expert advice, and is driven by the investment objectives set out in Section 4 below.
- ii. The *day to day management* of the assets, which is largely delegated to the Trustees' selected investment managers. Details are outlined in Section 5 below, with full details in the IIPD.
- iii. The *ongoing measurement and monitoring* of the performance of the appointed managers against predetermined benchmarks. Again, this is the responsibility of the Trustees.

Investment managers are appointed based on their capabilities and, therefore, their perceived likelihood of achieving the expected return and risk characteristics required for the asset class being selected for.

The Trustees look to their Investment Consultant for their forward looking assessment of a manager's ability to outperform over a full market cycle. This view will be based on the Investment Consultant's assessment of the manager's idea generation, portfolio construction, implementation and business management, in relation to the particular investment fund that the Plan invests in. The Investment Consultant's manager research ratings assist with due diligence and questioning managers during presentations to the Trustees and are used in decisions around selection, retention and realisation of manager appointments.

If the approach to investment process or the investment objective for a particular manager's fund changes, the Trustees will review the fund appointment to ensure it remains appropriate and consistent with the Trustees' wider investment objectives.

As the Trustees invest in pooled investment vehicles they accept that they have no ability to specify the risk profile and return targets of the manager, but appropriate mandates can be selected to align with the overall investment strategy. The advice received and arrangements implemented are, in the Trustees' opinion, consistent with the requirements of Section 36 of the Act (as amended).

The trustees are long term investors and are not looking to change the investment arrangements on a frequent basis.

For the open-ended Fixed Income and Equity funds, there is no set duration for the manager appointments. The Trustees will retain an investment manager unless:

- There is a strategic change to the overall strategy that no longer requires exposure to that asset class or manager;
- The manager appointment has been reviewed and the Trustees have decided to terminate see the IIPD on realisation of assets.

For DC investments, all the funds are open-ended with no set end date for the arrangement. The Fund Range and Default Strategy are reviewed on at least a triennial basis. A manager's appointment may be terminated if it is no longer considered to be optimal nor have a place in the default strategy or general fund range.

#### 3.2 Asset Manager Evaluation

The Trustees receive investment manager performance reports on a quarterly basis, which present performance information over 3 months, 1, 3 and 5 years. The Trustees review the absolute performance, relative performance against a suitable index used as the benchmark, and against the manager's stated target performance (over the relevant time period) on a net of fees basis. The Trustees' focus is on long term performance but will put a manager 'on watch' if there are short term performance concerns.

If a manager is not meeting performance objectives, or their investment objectives for the mandate have changed, the Trustees may ask the manager to review their fees – either the Annual Management Charge or the performance related fee element.

The remuneration for the investment managers used by the Plan is based on assets under management. As part of the annual Value for Money ("VfM") assessment for the DC section, the Trustees review the investment manager fees.

#### 3.3 Portfolio Turnover Cost Monitoring

The Trustees ask investment managers to include portfolio turnover and turnover costs in their presentations and reports to the Trustees.

The Trustees do not currently define target portfolio turnover ranges for funds. However, the Trustees will engage with a manager if portfolio turnover is higher than expected. This is assessed by comparing portfolio turnover across the same asset class, on a year-for-year basis for the same manager fund, or relative to the manager's specified portfolio turnover range in the investment guidelines or prospectus.

Regarding the DC investments, the Trustees consider portfolio turnover costs as part of the annual VfM assessment.

The ability to assess the appropriateness of portfolio turnover costs is limited by the availability of data. The Trustees will monitor industry developments in how to assess these costs and incorporate this in future VfM assessments. Importantly, performance is reviewed net of portfolio turnover costs.

#### 4. Investment Objectives and Risk Management

#### 4.1 DB Section

#### Investment Objectives

The Trustees aim to invest the DB Section's assets in the best interests of the members and beneficiaries. The Trustees have agreed a number of objectives to help guide them in their strategic management of the assets and control the various risks to which the DB Section is exposed. The Trustees' primary objectives are as follows:

- To ensure that members and beneficiaries receive their promised benefits.
- To pay due regard to the Principal Employer's requirements relating to the amount and frequency of contributions to the DB Section.

At the latest actuarial valuation, the Actuary assumed that the DB Section's assets will achieve an investment rate of return on assets which exceeds that available from gilts. Based on advice from the Investment Consultant about realistic long-term assumptions, the Trustees expect the investment return resulting from the strategy adopted to at least meet the prudent expectations of the Actuary.

#### Risk

The Trustees recognise that it is not necessarily possible, or even desirable, to select investments that exactly match the DB Section's estimated liabilities. Given the ongoing commitment of the Principal Employer, a degree of investment risk can be taken on, in the expectation of generating excess returns relative to the lowest risk strategy, since it is also acceptable to the Principal Employer.

The Trustees are aware that accepting a degree of investment risk means that there is a chance that one or more of the Trustees' objectives will not be met. Accordingly, the Trustees have considered the following risks to which the DB Section is exposed:

- The risk of deterioration in the DB Section's ongoing funding level. Volatility in the DB Section's funding level may be minimised by adopting a "least risk" investment strategy (i.e. one invested entirely in government bonds, whose value best matches fluctuations in the liabilities). However, in order to seek higher returns the Trustees must, to some extent, invest in riskier assets. This increases the risk that the funding level will deteriorate and may also increase the short-term volatility of the Principal Employer's contribution rate.
- The risk of a shortfall of assets relative to the liabilities as determined if the DB Section were to wind up.
- The risk that the day-to-day management of the assets will not achieve the rate of investment return within each asset class expected by the Trustees.

The Trustees have taken advice on these issues from the Investment Consultant and the Plan Actuary. It has also held related discussions with the Principal Employer.

The Trustees' willingness to take investment risk is dependent on the continuing financial strength of the Principal Employer and its willingness to contribute appropriately to the DB Section. The financial strength and perceived commitment of the Principal Employer to the DB Section is monitored and the Trustees will review the level of investment risk relative to the liabilities should either of these deteriorate.

There are various risks to which any pension plan is exposed. The Trustees consider the risks set out below to be financially material to the DB Section and has therefore adopted various policies in order to manage these risks over the DB Section's anticipated lifetime:

- The risk arising through a mismatch between the DB Section's asset and liabilities. The Trustees aim to mitigate this risk by investing a proportion of the DB Section's assets in instruments that are expected to react in a similar way to movements in long term interest rates and inflation expectations as the DB Section's liabilities.
- The Trustees also recognise the market risk associated with the different asset classes in which the DB Section invests. The Trustees believe that diversification by asset class limits the impact of any single risk. The Trustees therefore aim to ensure that the asset allocation policy in place results in an adequately diversified portfolio. Due to the size of the DB Section's assets, and recognising the need to diversify, investment exposure is obtained via pooled vehicles.
- The Trustees acknowledge that currency risk may also arise due to investment in overseas markets and has sought to mitigate this risk by establishing a currency hedging policy (details of which are outlined in the IIPD).
- The Trustees recognise that there is a risk in holding assets that cannot easily be sold, should the need arise, and therefore looks to invest in funds which are readily marketable. Where this is not the case, consideration is given to the overall liquidity of the DB Section's assets with the aim of ensuring that there is sufficient liquidity to meet the DB Section's ongoing cash flow requirements.
- The Trustees believe that Environmental, Social and Governance ("ESG") issues, including climate change, may have substantive impacts on the global economy and therefore investment returns. The Trustees seek to minimise the risks associated with such issues by taking them into account in the selection, retention and realisation of the investment managers. Section 7 of this Statement documents the Trustees' policy on ESG integration.

The Trustees acknowledge that the above list of risks is not exhaustive and it is not possible to monitor all risks at all times. However, the Trustees only seek to take on those risks it expects to be rewarded for over time, in the form of excess returns, in a diversified manner.

#### Investment Strategy

The exact details of the DB Section's investment strategy are outlined in the IIPD. The Trustees implement an investment strategy consistent with its investment objectives. The Trustees believe that the investment risk arising from the investment strategy is consistent with the overall level of risk being targeted.

#### 4.2 DC Section

#### Investment Objectives

The Trustees recognise that members of the DC Section of the Plan have differing investment needs and that these may change during the course of members' working lives.

The Trustees believe that members should be encouraged to make their own investment decisions based on their individual circumstances. The Trustees regard their duty as making available a range of investment funds that will suit members' needs and risk tolerances through their working life.

The Trustees recognise that members may not believe themselves qualified, or may not wish to make their own investment decisions. As such, the Trustees make available a Default Investment Strategy. The Trustees acknowledge that this strategy will not meet the needs of every individual member.

#### Risk Management and Measurement

The Trustees have considered investment risk for the Defined Contribution Section of the Plan from a number of perspectives. These are set out in the table below:

Ris	k	Description	How is the risk monitored and managed?
ks	Inflation risk	The risk that the investment return over members' working lives will not keep pace with inflation and does not, therefore, secure an adequate pension.	The Trustees make available a range of funds, across various asset classes, with the majority expected to keep pace with inflation.
Market risks	Currency risk	The risk that fluctuations in foreign exchange rates will cause the value of overseas investments to fluctuate.	Members are able to set their own investment allocations, in line with their risk tolerances. Within active funds management of
	Credit risk	The risk that the issuer of a financial asset, such as a bond, fails to make the contractual payments due.	many of these market risks is delegated to the fund manager.

Risk	Description	How is the risk monitored and managed?
Equity, property and other price risk	The protection of capital, over at least the medium-term (i.e. periods over 3 years), is fundamental in supporting the long-term growth of the members' individual accounts. The value of securities, including equities and interest bearing assets, can go down as well as up. Members may not get back the amount invested.	
Environmental, Social and Corporate Governance risk	The risk that environmental, social or corporate governance concerns, including climate change, have a financially material impact on the return of the Plan's assets.	The management of ESG related risks is delegated to investment managers. The Trustee's' responsible investment and corporate governance statement is contained in section 8 of this document.
Investment Manager risk	The risk that the investment manager underperforms its objectives, fails to carry out operational tasks, does not ensure safe-keeping of assets or breaches agreed guidelines.	The Trustees regularly review performance of investment funds.
Liquidity risk	The risk that the members' investments do not provide the required level of liquidity and members are unable to realise their investments.	Members invest in a range of daily dealt pooled investment vehicles that facilitate the availability of assets to meet benefit outflows.

Risk	Description	How is the risk monitored and managed?
		The Trustees make available three lifestyle strategies for DC members.
Pension Conversion risk	The purchasing power of members may fall relative to how they wish to take benefits at retirement or the risk that the member is invested in a strategy that does not reflect the way in which they intend to take their benefits at retirement.	Lifestyle strategies automatically switch member assets into investments whose value is expected to be less volatile relative to how the member wishes to access their pension savings as they approach retirement age. Members are communicated with in the lead up to retirement reminding them of the need to assess their needs for retirement options.

The Trustees have considered these risks when choosing the funds to make available to members. The Trustees believe that the investment strategy for the Defined Contribution Section of the Plan is appropriate for meeting the risks outlined above.

The Trustees pay close regard to the risks which may arise from the lack of diversification of investments. The Trustees believe that the choice of funds in place provide an adequately diversified distribution of assets.

The Trustees recognise that many of these risks are inherent to investing and understand that the above list is not exhaustive.

#### Investment Strategy

The Trustees have selected a range of investment options for members to utilise in structuring their assets according to their individual objectives. Details of the fund options, including the investment strategies of the default option, can be found in the IIPD.

#### 4.3 **Default Investment Option for the DC Section**

Typically, a proportion of members will actively choose the default option because they feel it is most appropriate for them. However, it is expected that the vast majority of members will not make an active investment decision and will therefore automatically be invested in the default option.

The default option aims to generate investment returns over the working lives of members and has been designed for members who want to take their savings as cash when they retire.

#### Objectives of the default option

The Trustees' objectives in relation to the default option, and the ways in which the Trustees seek to achieve these, are detailed below:

 To provide long-term investment growth through exposure to a diversified range of asset classes, with some protection against inflation erosion, and an element of diversification to reduce volatility and downside risk.

The lifestyle investment strategy offers members the potential to grow the pension pot in the long term, by investing in a diversified range of assets.

• To counter the greater impact of investment risk on member outcomes, as retirement savings grow, and reduce investment risk as each member approaches retirement.

As a member gets closer to retirement the member's pension pot is gradually moved into lower risk funds in order to provide capital protection. This is achieved via automated lifestyle switches over a three year switching period. This strategy aims to reduce the risk of a sharp fall in markets reducing the value of a member's pension pot as the member approaches retirement.

• To offer to members a portfolio of assets at retirement that are appropriate for an individual intending to take their pension pot as cash.

At the selected retirement date, 100% of the member's assets will be invested in a cash fund, which is the expected method of taking benefits given the nature of the membership.

#### Policies in relation to risk management of the default option

In designing the default option, the Trustees have explicitly considered the trade-off between risk and expected returns. Risk is not considered in isolation, but in conjunction with expected investment returns and retirement outcomes for members. In particular, when reviewing the investment strategy of the default investment option, the Trustees consider risk quantitatively in terms of the variability of investment returns and potential retirement outcomes for members. From a qualitative perspective, the Trustees also consider risk in terms of the (mis)alignment of investments with the retirement benefits targeted by the default investment option.

In arriving at their investment strategy for the default investment option the Trustees have considered investment risk from a number of perspectives. These are:

Type of Risk	Risk	Description	How is the risk monitored and managed?
--------------------	------	-------------	--

Type of Risk	Risk	Description	How is the risk monitored and managed?
	Inflation risk	The risk that the investment return over members' working lives will not keep pace with inflation and do not secure adequate retirement benefits.	The default option has an explicit allocation to assets that are expected to outperform inflation over the long term. The Trustees monitor performance of the growth phase
Market risks	Currency risk	The risk that fluctuations in foreign exchange rates will cause the value of overseas investments to fluctuate.	against inflation. The strategy for the default option is set with the intention of diversifying these risks to reach a level of risk deemed appropriate. The default option is a lifestyle strategy which
Mark	Credit risk	The risk that the issuer of a financial asset, such as a bond, fails to make the contractual payments due.	automatically and gradually reduces the level of investment risk members are exposed to as they approach retirement. The strategy is outsource to Legal & General.
	Equity, property and other price risk	The risk that investment market movements lead to a substantial reduction in the anticipated level of the benefit.	Within active funds the management of many of these market risks is delegated by Legal & General to the underlying investment manager.
and Co	nmental, Social orporate nance risk	The risk that environmental, social or corporate governance concerns, including climate change, have a financially material impact on the return of the Plan's assets.	Managed in line with the main Plan, as set out in Section 4.2.

Type of Risk	Risk	Description	How is the risk monitored and managed?
Investr	nent Manager risk	The risk that the investment manager underperforms its objectives, fails to carry out operational tasks, does not ensure safe-keeping of assets or breaches agreed guidelines.	Managed in line with the main Plan, as set out in Section 4.2.
Liquidi	ty risk	The risk that the Plan's assets cannot be realised at short notice in line with member demand.	Managed in line with the main Plan, as set out in Section 4.2.
Pensic	on Conversion risk	The risks that the member is invested in a strategy that does not reflect the way in which they intend to take their benefits at retirement.	The default option is a lifestyle strategy which automatically switches member assets into investments whose value is expected to be less volatile relative to cash as the member approaches retirement age. As part of the triennial default strategy review, the Trustees ensure the default destination remains appropriate.

The above items are in relation to what the Trustees consider 'financially material considerations' specifically related to the default option. The Trustees believe the appropriate time horizon for which to assess these considerations within should be viewed at a member level. This will be dependent on the member's age and when they expect to retire. It is partly for this reason that the default investment option is a lifestyle strategy.

#### Suitability of the default option

Based on the Trustees' understanding of the Plan's membership, an investment strategy that targets a cash lump sum at retirement is expected to be broadly appropriate to meet a typical member's requirements for income in retirement. This does not mean that members have to take their benefits in this format at retirement, it merely determines the investment strategy that will be in place pre-retirement.

Assets in the default option are invested in the best interests of members and beneficiaries, taking into account the profile of members. Considering the demographics of the Plan's membership and the Trustees' views of here the membership might behave at retire membership and the trustees of the plane the membership might behave at retire membership and the trustees of the plane the membership might behave at retire membership and the trustees of the plane the membership might behave at retire membership and the trustees of the plane the membership might behave at retire member

the Trustees believe that the current default option is appropriate and will continue to review this regularly, and more strategically at least triennially, or after significant changes to the Plan's demographic (if sooner).

## 5. Day to Day Management of the Assets

#### 5.1 DB Section and DC Section

The Trustees delegate the day to day management of the assets to a number of investment managers. The Trustees have taken steps to satisfy themselves that the managers have the appropriate knowledge and experience to manage the Plan's investments and that they are carrying out their work competently.

Each investment manager is regulated by a recognised authority body and the Trustees assess the suitability of regulation in place prior to investing with any manager.

The Trustees review the continuing suitability of the Plan's investments, including the appointed managers, which may be adjusted from time to time.

Details of the appointed managers for the DB and DC Sections, as well as the investment options available for the DC Section, can be found in the IIPD.

#### 5.2 Additional Voluntary Contributions

Arrangements in respect of members' Additional Voluntary Contributions are set out in the IIPD.

#### 6. Realisation of Investments

In general, the Plan's investment managers have discretion in the timing of realisations of investments and in considerations relating to the liquidity of those investments within the parameters stipulated in the relevant appointment documentation and pooled fund prospectuses.

The investment managers are responsible for generating any cash required to pay benefits and other expenditure on the instruction of the Trustees.

#### 7. Responsible Investment and Corporate Governance

The Trustees believe that good stewardship and ESG issues, including climate change, can have a financially material impact on the risk and return outcomes of investment portfolios and should therefore be considered as part of the Plan's investment process.

The Trustees believe that good stewardship can enhance long-term portfolio performance and is therefore in the best interests of the Plan's beneficiaries and aligned with fiduciary duty.

The Trustees have given the investment managers full discretion when evaluating ESG issues and in exercising rights and stewardship obligations attached to the Plan's investments.

The Plan's voting rights are exercised by its investment managers in accordance with their own corporate governance policies. The Trustees expect the Plan's managers to take into account current best practice, including the UK Corporate Governance Code and the UK Stewardship Code, of which the Trustees are supportive. Equity managers who are registered in the UK are expected to report on their adherence to the UK Stewardship Code on an annual basis.

The Trustees will also consider the Investment Consultant's assessment of how each investment manager embeds ESG into its investment process and how the manager's responsible investment philosophy aligns with the Trustees' responsible investment policy. This includes the investment managers' policy on voting and engagement. The Trustees will use this assessment in decisions around selection, retention and realisation of manager appointments.

The Trustees review an annual stewardship monitoring report, which includes details of voting and engagement activities associated with each of the funds invested in. The Trustees will challenge manager decisions that appear out of line with the investment fund's objectives or the objectives/policies of the Plan.

The Trustees review investment managers' compliance against the UK Stewardship Code on an annual basis.

Voting and engagement activity should be used by investment managers to discuss the performance of an issuer of debt or equity. Investment managers are aware that their continued appointment is based on their success in delivering the mandate for which they have been appointed to manage. If the Trustees are dissatisfied, then they will look to replace the manager.

Member views and non-financially material issues are not currently explicitly taken into account in the selection, retention and realisation of investments.

# Compliance with and Review of this Statement

The Trustees will monitor compliance with this Statement regularly.

The Trustees will review the Statement at least every three years and without delay after any significant changes in investment policy. The Statement will also be reviewed in response to any material changes to any aspects of the Plan, its liabilities, finances and the attitude to risk of the Trustees and the Principal Employer which they judge to have a bearing on the stated investment policy. Any such review will be based on written expert investment advice and the Principal Employer will be consulted.

# For and on behalf of the Trustees of the Snap-on Tools Limited Pension & Benefit Plan

Dates of amendment:

- Drafted August 2010
- Amended September 2012
- Amended October 2014
- Amended September 2019
- Amended August 2020

# **Annual Implementation Statement**

# **Snap-on Tools Limited Pension & Benefit Plan**

# October 2020

#### **Introduction**

This statement sets out how, and the extent to which, the Statement of Investment Principles ('SIP') produced by the Trustees of the Snap-on Tools Limited Pension & Benefit Plan (the "Plan") has been followed during the year to 30 April 2020. This statement has been produced in accordance with The Pension Protection Fund (Pensionable Service) and Occupational Pension Schemes (Investment and Disclosure) (Amendment and Modification) Regulations 2018 and the guidance published by the Pensions Regulator. The table later in the document sets out the how, and the extent to which, the policies in the SIP have been followed.

#### **Investment Objectives of the Plan**

The Trustees believe it is important to consider the policies in place in the context of the investment objectives they have set. The objectives of the DB and DC Sections of the Plan included in the SIP are as follows:

#### **DB** Section

The Trustees aim to invest the DB Section's assets in the best interests of the members and beneficiaries. The Trustees have agreed a number of objectives to help guide them in their strategic management of the assets and control the various risks to which the DB Section is exposed. The Trustees' primary objectives are as follows:

- To ensure that members and beneficiaries receive their promised benefits.
- To pay due regard to the Principal Employer's requirements relating to the amount and frequency of contributions to the DB Section.

At the latest actuarial valuation, the Actuary assumed that the DB Section's assets will achieve an investment rate of return on assets which exceeds that available from gilts. Based on advice from the Investment Consultant about realistic long-term assumptions, the Trustees expect the investment return resulting from the strategy adopted to at least meet the prudent expectations of the Actuary.

#### **DC Section**

The Trustees recognise that members of the DC Section of the Plan have differing investment needs and that these may change during the course of members' working lives.

The Trustees believe that members should be encouraged to make their own investment decisions based on their individual circumstances. The Trustees regard their duty as making available a range of investment funds that will suit members' needs and risk tolerances through their working life.

The Trustees recognise that members may not believe themselves qualified, or may not wish to make their own investment decisions. As such, the Trustees make available a Default Investment Strategy. The Trustees acknowledge that this strategy will not meet the needs of every individual member.

#### **Review of the SIP**

During the year the Trustees reviewed the Plan's SIP. A revised version of the SIP was agreed in September 2019 (and minuted at the Trustee meeting on 10 September 2019) in order to reflect new requirements under The Occupational Pension Scheme (Investment and Disclosure) (Amendment) Regulations 2019. This included the addition of policies in relation to financially material considerations, including environmental social and governance ('ESG') considerations and explicitly climate change, the extent to which non-financial matters are taken into account, as well as the approach to stewardship (including engagement) of investments.

Consistent with the aforementioned regulations, a number of further revisions to the SIP were agreed post year-end (and minuted at the Trustee meeting on 29 September 2020). These related to the following:

- How the arrangements with the asset managers incentivise the asset managers to align their investment strategy and decisions with the Trustees' policies in the SIP.
- How that arrangement incentivises the asset managers to make decisions based on assessments about medium to long-term financial and non-financial performance of an issuer of debt or equity and to engage with issuers of debt or equity in order to improve their performance in the medium to long-term.
- How the method (and time horizon) of the evaluation of asset managers' performance and the remuneration for asset management services are in line with the Trustees' policies mentioned in the SIP.
- How the Trustees monitor portfolio turnover costs incurred by the asset managers and how they define and monitor targeted portfolio turnover or turnover range.
- The duration of the arrangement with the asset managers.

#### Assessment of how the policies in the SIP have been followed for the year to 30 April 2020

The information provided in this section highlights the work undertaken by the Trustees during the year, and longer term where relevant, and sets out how this work followed the Trustees' policies in the SIP, relating to the Plan as a whole and the default investment arrangement. The SIP is attached as an Appendix and sets out the policies referenced below.

## **DB** Section

	Requirement	Policy	In the year to 30 April 2020
1	Securing compliance with the legal requirements about choosing investments	The Trustees obtain advice from their investment adviser, who can provide expert advice enabling the Trustees to choose investment vehicles that can fulfil the Plan's investment objectives. The advice received and arrangements implemented are, in the Trustees' opinion, consistent with the requirements of Section 36 of the Pensions Act.	The Legal & General Investment Management ("LGIM") and Aberdeen Standard Investments ("ASI") managed mandates were terminated in June 2019 and replaced with BlackRock managed funds. The Trustees received advice throughout the transition.
2	Kinds of investments to be held and balance between different kinds of investments	The basis of the Trustees' strategy is to divide the Plan's assets between an Equity portfolio and a Bond portfolio. The Equity portfolio comprises of developed market (50% currency hedged) and emerging market equity assets (no currency hedging in place). The Bond Portfolio comprises of UK index linked gilts and corporate bond assets. The strategic asset allocation is set to achieve the expected return required within an acceptable level of risk.	The Trustees reviewed the investment strategy in 2019 and moved assets to BlackRock in June 2019. The Trustees regard the basic distribution of the assets to be appropriate for the Plan's objectives and liability profile and have maintained the current asset allocation over the year ending 30 September 2020. The underlying investment managers have discretion in the timing of realisation of investments and in considerations relating to the liquidity of those investments within parameters stipulated in the relevant appointment documentation.

Page 4 Annual Implementation Statement

	Requirement	Policy	In the year to 30 April 2020
3	Risks, including the ways in which risks are to be measured and managed	The Trustees consider risk (both investment and operational) from a number of perspectives in relation to the DB Section of the Plan.	As detailed in Section 4.1 of the SIP, the Trustees consider both quantitative and qualitative measures for these risks when deciding investment policies, strategic asset allocation, the choice of fund managers / funds / asset classes.
			The Trustees reviewed the risks of the Plan's assets as part of their strategy review in 2019. The Trustees concluded that the changes in strategy were in line with their risk appetite and that they continue to only take on those risks it expects to be rewarded for over time, in the form of excess returns, in a diversified manner.
4	Expected return on investments	The Plan's assets are expected to provide an investment return commensurate with the level of risk being taken.	The investment performance report is reviewed by the Trustees on a quarterly basis and includes the risk and return characteristics of the invested assets.
			The investment performance report includes how the investment manager is delivering against specific benchmarks.
			Over the 3 years to 31 March 2020, the Plan has returned 0.9% p.a. relative to a benchmark return of 0.6% p.a., both gross of fees.
5	Realisation of investments	The Trustees' administrators will realise assets following member requests on retirement or earlier where required.	The disinvestment policy for meeting benefit payments consisted of disinvesting to balance the actual allocation with the strategic allocation.
		The Trustees consider the liquidity of the investment in the context of the likely needs of members.	

#### Page 5 Annual Implementation Statement

	Requirement	Policy	In the year to 30 April 2020
6	Financially material considerations over the appropriate time horizon of the investments, including how those considerations are taken into account in the selection, retention and realisation of investments	The Trustees consider financially material considerations in the selection, retention and realisation of investments. Within the funds consideration of such factors, including ESG, is delegated to the investment manager, as detailed in section 7 of the SIP. Investment managers are expected to evaluate these factors, including climate change considerations, and exercise voting rights and stewardship obligations attached to the investments in line with their own corporate governance policies and current best practice.	The investment performance report is reviewed by the Trustees on a quarterly basis. BlackRock remained generally highly rated (both generally and from an ESG specific perspective) by the investment advisers during the year. The Plan's SIP includes the Trustees' policy on ESG factors, stewardship and climate change. This policy sets out the Trustees' beliefs on ESG and climate change and the processes followed by the Trustees in relation to voting rights and stewardship. In order to establish their beliefs and produce the policy, the Trustees undertook investment training provided by their investment consultant on responsible investment, which covered ESG factors, stewardship, climate change and ethical investing. The Trustees keep their policies under regular review with the SIP subject to review no less frequently than triennially. When implementing a new manager the Trustees would consider the ESG rating of the manager. The Trustees acknowledge that managers in fixed income do not have a high ESG rating assigned by the investment consultant due to the nature of the asset class where it is harder to engage with the issuer of debt. The investment performance report includes how the investment manager is delivering against their specific mandates.

Page 6 Annual Implementation Statement

	Requirement	Policy	In the year to 30 April 2020
7	The extent (if at all) to which non-financial matters are taken into account in the selection, retention and realisation of investments	Member views and non-financially material issues are not currently explicitly taken into account in the selection, retention and realisation of investments.	Whilst members' views and non-financial issues are not currently explicitly factored in, the Trustees will continue to review their position on this policy.
8	The exercise of the rights (including voting rights)	Investment managers are expected to exercise voting rights and stewardship	The Trustees have delegated their voting rights to the investment managers.
	attaching to the investments	obligations attached to the investments in line with their own corporate governance policies and current best practice.	Investment managers are expected to provide voting summary reporting on a regular basis, at least annually. The reports are reviewed by the Trustees to ensure that they align with the Trustees' policy.
			The Trustees are looking to enhance its reporting on voting activity by reviewing an annual voting and engagement report which will be provided by BlackRock.
			The Trustees do not use the direct services of a proxy voter. BlackRock's proxy voting process is led by the BlackRock Investment Stewardship team (BIS). They use Institutional Shareholder Services' (ISS) electronic platform to execute their vote instructions, manage client accounts in relation to voting and facilitate client reporting on voting
			The voting policy of BlackRock has been considered by the Trustees and the Trustees deem it to be consistent with their investment beliefs.
			Votes undertaken by BlackRock's passive (global and emerging market) equities mandate over the year to 31 December 2019 are summarized below:

	<ul> <li>BlackRock cast almost 28,000 votes over the year ending 31 December 2019, over 90% of the votable proposals.</li> </ul>
	• Of the votes cast, over 7% were votes against management as these were not in the shareholder's best interest.
	Over the year to 31 December 2019, the Trustees did not consider the voting activity in detail but will do so going forwards.
	Over the prior 12 months, the Trustees have not actively challenged the manager on its voting activity. Going forwards, the Trustees will be more active in reviewing and, when appropriate, challenging voting activity, particularly in respect of its beliefs on climate change.

Page 8 Annual Implementation Statement

	Requirement	Policy	In the year to 30 April 2020
9	Undertaking engagement activities in respect of the investments (including the methods by which, and the circumstances under which, trustees would monitor and engage with relevant persons about relevant matters)	The Plan's voting rights are exercised by its investment managers in accordance with their own corporate governance policies. The Trustees expect the Plan's managers to take into account current best practice, including the UK Corporate Governance Code and the UK Stewardship Code, of which the Trustees are supportive. Equity managers who are registered in the UK are expected to report on their adherence to the UK Stewardship Code on an annual basis. Outside of those exercised by investment managers on behalf of the Trustees, no other engagement activities are undertaken.	<ul> <li>Investment managers are expected to provide reporting on a regular basis, at least annually including stewardship monitoring results. These are reviewed by the Trustees.</li> <li>Over the year to 31 December 2019: <ul> <li>BlackRock had over 1,400 engagements with 1,254 companies (45% of the Manager's portfolio).</li> <li>29% of the engagements were related to environmental impacts with 17% related to climate risk management.</li> </ul> </li> <li>The Trustees rely on BlackRock's stewardship reports in monitoring voting activity and in particular engagement related to climate change.</li> <li>As the scheme invests solely in pooled funds, the Trustees require their investment managers to engage with the investee companies on their behalf. At present, when the investment manager presents to the Trustees, the Trustees ask the investment manager to highlight key engagement activity and the impact the actions have had on the portfolio.</li> <li>The Trustees requested that the investment manager confirms compliance with the principles of the UK Stewardship Code. BlackRock confirmed that they are signatories of the current UK Stewardship Code and plan to submit the required reporting to the Financial Reporting Council by 31 March 2021 in order to be on the first list of signatories for the UK Stewardship Code 2020 that took effect on 1 January 2020.</li> </ul>

	The Trustees also required details of relevant engagement and
	voting activity for the year, including details of the most
	significant votes cast. The Trustees noted the information
	provided by the manager but took no further action. The
	Trustees will be reviewing the engagement and voting
	information in more detail going forwards to ensure that
	BlackRock actions are in line with the Trustees' investment
	beliefs.

# DC Section

	Requirement	Policy	In the year to 30 April 2020
1	Securing compliance with the legal requirements about choosing investments	The Trustees obtain advice from their investment adviser, who can provide expert advice enabling the Trustees to choose investment vehicles that can fulfil the Plan's investment objectives. The advice received and arrangements implemented are, in the Trustees' opinion, consistent with the requirements of Section 36 of the Act	No new investment vehicles were introduced over the Plan year.
2	Kinds of investments to be held	The Trustees have selected a range of investment options for members to utilise in structuring their assets according to their individual objectives. The Trustees recognise that members of the DC Section of the Plan have differing investment needs and that these may change during the course of members' working lives. The Trustees believe that members should be encouraged to make their own investment decisions based on their individual circumstances. The Trustees regard their duty as making available a range of investment funds that will suit members' needs and risk tolerances through their working life.	Within the DC Section, the default investment option was subject to its formal triennial review in March 2020. The current default option, investment strategies, funds and consolidation options were reviewed in light of the current membership. No immediate changes were made following this initial review. The Trustees concluded that the available range of funds/types of investments available to members continued to be appropriate and provided members options across the risk/return spectrum. The details of the types of investment referenced in the SIP/IPID remains consistent with the fund range offered to members.

The Trustees recognise that members may not believe themselves qualified, or may not wish to make their own investment decisions. As such, the Trustees make available a Default Investment Strategy. The Trustees acknowledge that this strategy will not meet the needs of every individual member.	
The underlying funds chosen by the Trustees to be made available to members are pooled fund vehicles operated by LGIM, to which the Trustees have effectively delegated day to day investment decisions.	

Page 12 Annual Implementation Statement

	Requirement	Policy	In the year to 30 April 2020
3	The balance between different kinds of investments	Members can combine the investment funds in any proportion in order to determine the balance between different kinds of investments. This will also determine the expected return on a member's assets and should be related to the member's own risk appetite and tolerances. Each of the available funds is considered to be diversified across a reasonable number of underlying holdings / issuers. Within the default option, the asset allocation is set to achieve the expected risk/return required to meet the objective of the default option.	The asset allocation of the default investment option is reviewed on a triennial basis, in line with regulatory requirements. The date of the last review was March 2020. The review considered the diversification of the underlying fund structure, projected fund values for different demographics of the membership, and wider market trends at retirement. No changes were made as a result and the default still targets cash at retirement. The Trustees receive a quarterly investment performance report from LGIM. This monitors the risk and return of the funds used within the DC Section of the Plan.
4	Risks, including the ways in which risks are to be measured and managed	The Trustees consider risk (both investment and operational) from a number of perspectives in relation to the self-select funds and the default investment option.	As detailed in section 4.2 of the SIP, the Trustees consider both quantitative and qualitative measures for these risks when deciding investment policies, strategic asset allocation, the choice of fund managers / funds / asset classes. This was taken into account in the March 2020 default investment option strategy review.

	Requirement	Policy	In the year to 30 April 2020
5	Expected return on investments	The funds available are expected to provide an investment return commensurate with the level of risk being taken.	The investment performance reports are reviewed by the Trustees on a quarterly basis. The investment performance report includes how the investment manager is delivering against their specific mandates.
		In designing the default, the Trustees have explicitly considered the trade-off between risk and expected returns.	Within the quarterly performance reports provided to the Trustees, performance for each fund is shown alongside its target performance over 3 month, 12 month, 3 year and 5 year time periods where available. These are then analysed to show how each fund has performed against their benchmark and target (for active funds).
6	Realisation of investments	The Trustees' administrators will realise assets following member requests on retirement or earlier where required. The Trustees consider the liquidity of the investment in the context of the likely needs of members.	The Trustees receive an administration report on an annual basis to confirm that core financial transactions are processed within service level agreements and regulatory timelines. As confirmed in the Chair's Statement, the Trustees are satisfied that 91% of the cases throughout the year were met within service level agreements. All funds utilized by the DC Section are daily dealt pooled investment vehicles, accessed by an insurance contract and should be realizable based on member demand. No changes were made to the investment options during the year.

	Requirement	Policy	In the year to 30 April 2020
7	Financially material considerations over the appropriate time horizon of the investments, including how those considerations are taken into account in the selection, retention and realisation of investments	The Trustees consider financially material considerations in the selection, retention and realisation of investments. Within the funds consideration of such factors, including environmental, social and governance factors, is delegated to the investment manager, as detailed in section 7 of the SIP. Investment managers are expected to evaluate these factors, including climate change considerations, and exercise voting rights and stewardship obligations attached to the investments in line with their own corporate governance policies and current best practice.	The investment performance is reviewed by the Trustees on an annual basis through the Value for Members report – this includes ratings (both general and specific ESG) from the investment advisers. All of the managers remained generally highly rated during the year. The Plan's SIP includes the Trustees' policy on ESG factors, stewardship and climate change. This policy sets out the Trustee's beliefs on ESG and climate change and the processes followed by the Trustees in relation to voting rights and stewardship. In order to establish these their beliefs and produce this the policy, the Trustees undertook investment training provided by their investment consultant on responsible investment, which covered ESG factors, stewardship, climate change and ethical investing. The Trustees keep the policies under regular review with the SIP subject to review at least triennially. When implementing a new manager the Trustees would consider the ESG rating of the manager. The Trustees acknowledge that managers in fixed income do not have a high ESG rating assigned by the investment consultant due to the nature of the asset class where it is harder to engage with the issuer of debt. For a similar reason, the Trustees are satisfied with the rating of its multi-asset managers.

	The investment performance report includes how the investment manager is delivering against their specific
	mandates.

	Requirement	Policy	In the year to 30 April 2020
8	The extent (if at all) to which non-financial matters are taken into account in the selection, retention and realisation of investments	Member views and non-financially material issues are not currently explicitly taken into account in the selection, retention and realisation of investments.	Whilst members' views and non-financial issues are not currently explicitly factored in, the Trustees will continue to review their position on this policy.
9	The exercise of the rights (including voting rights) attaching to the investments	Investment managers are expected to exercise voting rights and stewardship obligations attached to the investments in line with their own corporate governance policies and current best practice.	The Trustees have delegated their voting rights to the investment managers. Investment managers are expected to take into account current best practice, including the UK Corporate Governance Code and the UK Stewardship Code. The Trustees do not use the direct services of a proxy voter. The key voting activity for the Plan will be reviewed in detail during the 2020/2021 Plan year and reported in next year's Statement.

	Requirement	Policy	In the year to 30 April 2020
10	Undertaking engagement activities in respect of the investments (including the methods by which, and the circumstances under which, trustees would monitor and engage with relevant persons about relevant matters)	The Plan's voting rights are exercised by its investment managers in accordance with their own corporate governance policies. The Trustees expect the Plan's managers to take into account current best practice, including the UK Corporate Governance Code and the UK Stewardship Code, of which the Trustees are supportive. Equity managers who are registered in the UK are expected to report on their adherence to the UK Stewardship Code on an annual basis. Outside of those exercised by investment managers on behalf of the Trustees, no other engagement activities are undertaken.	Investment managers are expected to provide reporting on a regular basis, at least annually including stewardship monitoring results. Within the DC Section, the Plan invests solely in pooled funds, and therefore the Trustees require their investment managers to engage with the investee companies on their behalf. The key work relating to the Trustees' policy on ESG factors, stewardship and climate change is to be considered in detail during the 2020/2021 Plan year, and reported in next year's Statement.
